PRESCO

Scaffold Fittings & Metal Pressings

DROP-FORGED COUPLERS

- The range of Presco drop-forged couplers is the result of meticulous research into distortion points and areas of strain under stress. All products have grain flow which is controlled to put the strength directly where it is needed to provide tremendous resistance to distortion, enhanced durability and the long term economy users expect from Presco.
- Our range includes Tie-In Couplers in both fixed and swivel varieties. These couplers allow aluminium scaffold assemblies to be tied in to standard scaffolding installations.

The high specification includes:

- Conform to BS1139 Part 2 and EN74 Class A & B where applicable.
- Several finishes are available: Self-colour, zinc-coated/passivated, galvanised, sheradized etc.
- Available to fit a range of tube diameters and multiple bolt/nut configurations.
- Test certificates available.

From the Top:

Double Coupler
Swivel Coupler
Putlog Coupler
Single Coupler
Tie-In Double Coupler
Tie-In Swivel Coupler

Available through a network of approved distributors throughout the U.K.
